P R E F A C E.

We trust no apology is needed in presenting the FORTY-NINTH EDITION OF THOMPSON'S COIN CHART MANUAL to the public. We therefore call our patrons' attention to the special features of this edition. The values have been carefully revised and in several cases altered, great care being taken to give the official quotations for all the new pieces inserted. To facilitate reference an index has been added, and all the gold coins colored yellow, which will be found very convenient for brokers and others making rapid reference. We have received communications from several brokers, stating that the values of the pieces have been overrated. In reply, we would remind them that we do not profess to quote the prices they are to pay, but give the intrinsic value of coins of full weight of the designs given, the values being taken from assays conducted at the U. S. Mint. In regard to foreign gold we quote the prices which ought to be realized in U. S. gold coin, if sent to the Mint for coinage.

Persons wishing to sell a few pieces of any of the silver coins here represented can only realize about eighty for uncurrent and ninety per cent. for current coins, of the prices quoted. This reduction is owing partly to short weight, caused by the attrition to which the coins have been subjected in circulation, and the consequent loss, the balance being the charges on the transaction.

We shall be specially obliged to brokers and others who may favor us with specimens of *newly issued* foreign gold or silver coins, for which a fair per centage over their market value will be cheerfully paid.

As much counterfeit silver is now found, we annex the government test for silver coin; it can be put up by any chemist for a few cents: 24 grains nitric silver in crystals; 1 gramme or 15 grains of nitric acid and 1 ounce water. Remove a little of the surface of the coin with a knife and touch the place with a drop from the stopper. If good, no action; if bad it will blacken.

Many brokers may not be aware that the following U. S. coins, on account of their scarcity, command a considerable premium, varying according to their state of preservation. Our publishers will always pay from 25 to 500 per cent. over the face value for those contained in the following list:

DOLLARS. 1794, 1796, 1804, 1798 reverse of '97, 1801, 1836, 1838, 1839, 1850, 1851, 1852, 1853, 1854, 1855, 1856, 1857, 1858.

DEALERS IN

American and Foreign

COINS & MEDALS.

To facilitate a rapid despatch of business and insure accuracy in every branch, our large trade is divided into several departments, each under a responsible head, and satisfaction guaranteed in every case. All goods we sell are warranted genuine, and a written guarantee given when required.

RETAIL STORE.

Here we shall be happy to see any of our friends visiting New York. Although it is impossible to find room in one building to have all our immense stock displayed, still we are always pleased to show any special line in which our visitors are interested.

MAILING DEPARTMENT.

Collectors favoring us with their orders by mail may always rest assured that their wants will receive immediate attention, and secure the same careful and intelligent consideration as if they personally selected the goods;—it being a standing rule of the firm that “first come, first served,” letters being answered in the order and on the day they are received, and the best specimen in stock, of those graded at same price, invariably given.

AUCTION DEPARTMENT.

Our great experience in catalogueing coins and foreign stamps, for sale at public auction, justifies us in soliciting correspondence with parties owning valuable collections of these, or kindred works of art or antiquity, which they may wish to dispose of by public auction, our terms being as low as is consistent with proper regard to our patrons' interests. Possessing the leading papers in these lines (50,000 circulation), and a personal acquaintance with a very large number of collectors, gives us unsurpassed facilities to secure the representation of nearly every American collector.

COMMISSION DEPARTMENT.

We have competent representatives at every sale of goods in which we deal, and are prepared to execute commissions to purchase for collectors at the following rates, personally guaranteeing the genuineness of all goods purchased: On purchases under \$100, 10%; over \$100, 5%; a uniform charge of 50 cents made on any amount under \$5.

PUBLICATION DEPARTMENT.

Our various coin publications have been included with our other book business, and are all kept securely packed, ready for mailing, and are sent post free on receipt of order. We annex a list of a few which should be in every person's hands.

Coins. The best sold at ~~any~~ branch! 3700.

This catalogue gives the selling price of the various series of coins of which it treats, the text being profusely illustrated with engravings of the rarer pieces, to enable the collector to determine their nationality and date of issue. The value of the American coins is given in three degrees of preservation, which will be found a valuable feature of the work.

It will be found of great value to all NEWSDEALERS and STOREKEEPERS, as it gives the fictitious value of all American copper. By its means many small traders have made hundreds of dollars by selling coins taken in their stores, which they would otherwise have passed out in change. Price 25 cents, post free.

This handy manual is gotten up in the same style as the Copper coin catalogue, and is illustrated with well-executed engravings, of every American silver coin ever issued, and some of the most interesting foreign ones.

Our remarks concerning the value of the Copper coin catalogue, will apply with still greater force to this, for as the silver coin which has been hoarded up for the last fifteen years, comes again into circulation, many rare and valuable pieces are sure to reward those, who take the time to look at the dates, before paying them away. It must not be thought that it is only the old pieces that are valuable, as, for instance, the publisher will pay \$5.00 for the silver dollar of 1854, and so with other comparatively recent dates.

Price 25 cents, post free. Or the two bound in one volume, with a supplement containing *fac-similes*, of a number of old Roman and Greek coins. Price 50 cents, post free.

THE COINAGES OF THE WORLD, ANCIENT AND MODERN.

This work is intended to give correct information on a subject of which no educated person can afford to be ignorant; and yet, till the publication of this volume, it has been impossible to obtain a general knowledge of the *Coinages of the World* without reading through dozens of heavy quartos, at great loss of time, and probably heavy expense.

By the aid of this book, any person can at once determine the nationality of any coin they may possess, and obtain much interesting information concerning the cause which led to its issue. It is well filled with beautifully executed representative coins of every people, age and country, and is the only comprehensive book on the subject ever published. The paper, press-work and binding are all of the very best. No library can be complete without it.

PRICE—CLOTH, \$2.50. HALF MOROCCO, \$3.50.

For sale by all booksellers, or will be sent, post free, on receipt of price, by the publishers,

CRITIQUES.

The New York Times of December 27th, says:

“What every student of Coinages—not the mere collector of old coins—wants to know.”

The New York World of November 27th, says:

“Welcome to all amateur and experienced numismatologists, to whom it will not only convey valuable information, but be useful as a work of reference.”

The New York Evening Post of November 29th, says:

“A work of great interest to numismatists and collectors of coins. * * * The text, which is full, is illustrated by several hundred engravings of the principal coins of all ages and countries.”

The New York Daily Graphic of December 23d, says:

“Shows a great deal of special study and painstaking research. It is a monograph full of interesting and curious information, and besides its ample learning, gives several hundred engravings of the principal coins. The various appendices to the volume add materially to its convenience and value for reference.”

The American Journal of Numismatics of January 1st, says:

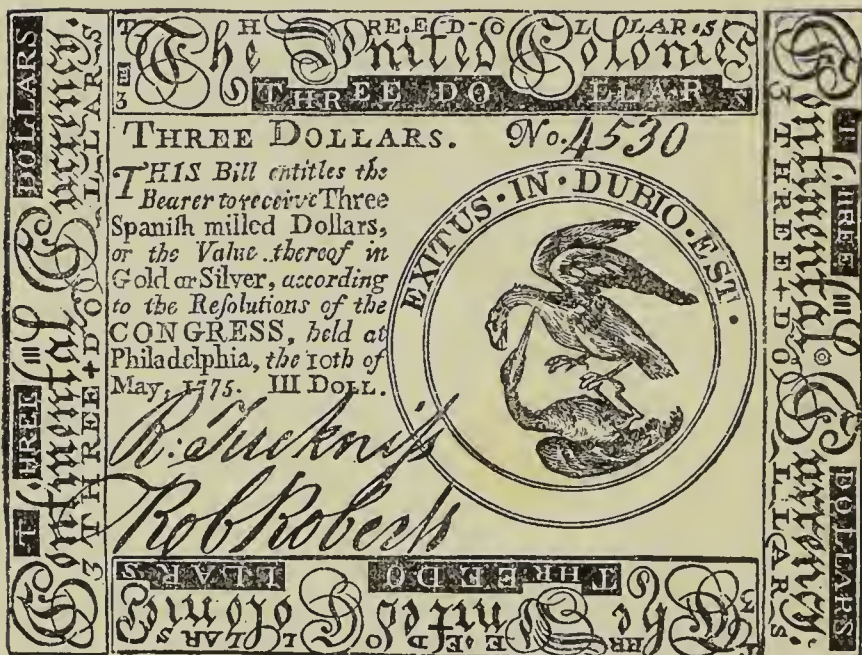

“This is an octavo volume of 306 pages, with a large number of wood-cuts of examples of both ancient and modern coins. It has several appendices, giving lists of the French sovereigns, explanations of the abbreviations on Roman coins, a list of Roman families who have issued coins, and other matters of interest. The text is sufficiently elaborate to give the general reader a good idea of the subject, and to excite his interest in the science of numismatics. From the brief examination we have been able to give it, we judge it to be one of the most valuable and compendious books on coins, especially for those collectors who have not the time or inclination to consult the ponderous quartos of the old writers, which has yet appeared.”

The Coin Collector's Journal of January 1st, says:

“This is decidedly the most important work on numismatics that has appeared during the past year, and will doubtless be the means of starting many new collections, as it is written in popular style, and occupies a field distinctly its own. The first chapter introduces us to the first coin, and we are gradually led from the coins of the Greek Island of Aegina, to those of Athens, Corinth and Macedonia; from Miletus and Ephesus to Egypt and Judea; from Grecia Magna to Rome, and so down through the Byzantine Empire to Mediæval and modern Europe, including also Asia, Africa and America (the coins of our country and England being very fully described), giving fine engravings of all the principal types of each, till every coin-issuing State or Colony has been noticed; in fact, it is more than a coin book, it is a short history of the world, and should be in every house.”

U. S. Fractional Currency.

Price - - - - 50 Cents.

It would be impossible at this date to claim that the list is perfect, but great care has been taken in its preparation, and every known variety of all the different kinds of paper money which have circulated in this country, has been tabulated according to date, so that any note is easily found, while the numerous full sized illustrations of Colonial and Continental money give material aid, likewise add interest to the book for the general reader. As an instance of its completeness we may call attention to the fact that 74 pieces of U. S. Fractional Currency are catalogued, while the highest number heretofore chronicled was only 48.

Besides being valuable as a check list of all uncurrent money issued by authority in this country, it is a comprehensive price list of Messrs. Scott & Company's large stock, the prices of which have been placed as low as the great and increasing demand for these interesting mementoes of our country's struggles for existence will admit of.
